Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's response filed on 11/20/2006 has been fully considered. Claims 1-6 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Ota (JP 2001-088430).
4. Ota discloses a recording material comprising a transparent base material [0018] and an ink absorbing layer provided on the base material, wherein the ink absorbing material comprises one or more of benzotriazole compounds listed in paragraph [0009]. The amount of the benzotriazole compound in the ink absorbing layer is 2-15 wt% [0015]. Ink jet printing method is used to print on the recording material [0026].

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ravichandran et al. (US 5,977,219) in view of Ota (JP 2001-088430).

7. Ravichandran discloses benzotriazole UV absorbers incorporated into automotive coating (abstract). A composition containing benzotriazole UV absorbers is provided on a paper or plastic film to form a layer absorptive for ink, and ink jet printing method is used for printing on the ink absorptive layer. Ravichandran does not disclose benzotriazole UV absorbers as recited in claims 1 and 4.

8. Ota discloses a recording material comprising a transparent base material [0018] and an ink absorbing layer provided on the base material, wherein the ink absorbing material comprises one or more of benzotriazole compounds listed in paragraph [0009]. The amount of the benzotriazole compound in the ink absorbing layer is 2-15 wt% [0015]. Ink jet printing method is used to print on the recording material [0026].

9. Ravichandran and Ota are analogous art because they are from a similar problem solving area, in relation to preventing bronzing. At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine the benzotriazole compound of Ota with the invention of Ravichandran in order to prevent bronzing of the printed surface.
